

106th Street Grille

From a background in the food service brokerage business over twenty years ago, Robert Garcia has developed a reputation as a savvy restaurateur. From the far northeast side restaurant known as Muldoon's to the far northwest side gathering place, the 106th Street Grille, Robert has been successful. In both operations, he called upon CRS to help him with his POS system. In the 106th Street Grille, CRS has installed four touch screen workstations connected to a remote kitchen printing system and reporting to a back office server.

"While each system has its own unique features, it has been the ongoing support from CRS and your staff that has made the system successful."

"The employee timekeeping has been very functional, reliable, and accurate in tracking hours, tips, and IRS compliance for the wait staff."

"From a security prospective, whenever a server signs on to the system, Maitre'D automatically knows what authority that server has in handling items such as discounts—"

"At the same time my customers are happy because the food comes out of the kitchen accurately and timely and their guest check is clear and easy to follow."

" I would gladly recommend the combination of CRS/Maitre'D to any food service operator seeking an efficient system with professional and dedicated support." Robert Garcia—Owner
