

## CLOVERDALE TRAVEL PLAZA

Situated at the US 231 exit from heavily travelled Interstate 70, this landmark facility has been serving great country food for over 25 years. Since acquiring this operation, Bains has also opened the Subway on his out lot along with a BP gas station across the street. Faced with aging equipment, he decided to implement a new Toshiba touch screen POS system from CRS (out of Indianapolis) He installed two Toshiba A10 all-in-one terminals with integrated credit card readers and Toshiba TRST A-10 high speed thermal printers connected to an Epson 200 kitchen printer.

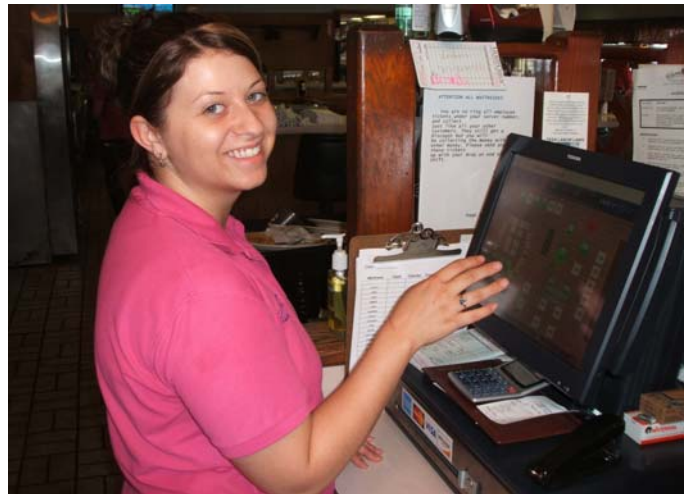

Said Bains "I guess the biggest surprise for me was just how easy it and simple it was to change from what we had been doing for so many years. I am very satisfied with CRS and the Toshiba WinPos system.

Raj (facility accountant) is seen here reviewing the credit card settlement. "Raj LOVES Mercury , said Bains,"Mercury is night and day difference from what we used to use from the gas side according to her"

Nikki talked about the table layout screen being a much faster way to open a check because you know where people are sitting—you can't always immediately remember their check number (like we used to have to do).

Said Nikki " Everybody uses the pop up typewriter keyboard for special instructions to the cook which will always happen in this type of business. Splitting and combining checks used to be almost a nightmare and now it is really quick"

**ALL I CAN SAY IS THE TRANSITION WAS SO MUCH EASIER THAN I HAD EVER IMAGINED—THANKS CERTAINLY IN PART TO GLEN'S GREAT HELP WITH EVERYTHING. —WE WERE EXPECTING THE SAME TYPE OF SUPPORT AND HELP WE HAVE ALWAYS RECEIVED —AND WE GOT IT"**
