

# Montana Mike's Steakhouse

Following their success with the Sirloin Stockade concept, the Stockade Companies began in 1998 franchising the Montana Mike's concept and Tim Rohrer has been involved in developing both in Indiana. Tim's newest restaurant is the first restaurant in the 70 Stockade restaurants to utilize the Maitre'D POS system. Tim has implemented kitchen video displays connected to five Posiflex terminals with server fingerprint identification. Recently, internet supported gift cards and a handheld wireless have been added to the system.

Tim comments "absolutely the easiest system for my servers to learn—adds up to expense reduction".

Note the fingerprint ID and table availability screen "identification for server security is much quicker and safer"

Tim Rohrer visits with Dave White (CRS) and Judy "you have been there with me every step of the way" As part of the total integration, CRS developed an Excel interface

Expediter and preparation screens are much cleaner and easier to work from than traditional remote printers"

**"In the final analysis, we chose Maitre'D and I'm glad we did. Our plans are to build additional restaurants and there is no reason to evaluate any other solution. CRS/Maitre'D will be our choice."** Tim Rohrer
