

Mrs Curl Ice Cream Shop & Outdoor Cafe

Mrs Curl has been quite a Greenwood, Indiana phenomenon since the day John Cassin bought it back in 1997. It started out as a simple ice cream store patterned after a DQ walk up but through the years, it became a “gathering place” for friends and family. As his food sales increased so did the confusion in getting the orders correct. In March of this year, John installed the Toshiba WinPos touch screen system connected to a kitchen printer to speed up the ordering process and improve the accuracy.

“I would suggest that any operator who might think he is too small to make this type investment, needs to look at my very satisfying experience”

Afton told me that she was so excited about how much easier it was to take care of our customers that she literally fell in love with the new system. Her boyfriend became jealous

In talking to Heldi, and others, It was pretty clear that printing our food orders out in the kitchen preparation area using a two color printer (prep modifications stood out), made speed and accuracy guaranteed.

Your preparation and programming of our menu, ordering procedures and screens was excellent and only exceeded by the effort put forth in training all of our people thoroughly.

THE TOSHIBA WINPOS SYSTEM ALSO HAS AN INVENTORY MODULE INCLUDED AS WELL AS INTEGRATED CREDIT CARDS WHICH ARE BOTH PART OF THE BASIC SOFTWARE I PURCHASED AND HOPE TO USE IN THE FUTURE. THIS TRANSITION JUST COULD NOT HAVE BEEN EASIER

John Cassin — Owner
