

# NCR RealScan™ 92 Presentation Scanner

## The Best of Both Worlds

- Three scanners in one
- Exceptional read rates
- Unsurpassed durability
- Flexibility for any retail environment
- Speech Diagnostics

The NCR RealScan 92 presentation scanner offers a unique, flexible approach to scanning. Using an omni-directional scan pattern, the NCR RealScan 92 allows for fast presentation and pass-by scanning. Coupled with a built in single-line mode for pin-point accuracy, this scanner can easily decipher bar codes that are in close proximity to each other.

### Unique Features, Better Checkouts

The NCR RealScan 92 incorporates technical innovations requested by retailers – innovations needed to enhance customer service. It is the only omni directional presentation scanner combined with a selectable single-line scan pattern *utilizing a two-stage button*. This unique combination allows sales associates to read all types of product. Typical items are easily presented to the scanner for fast, efficient bar code reading, while items with multiple bar codes can be accurately targeted with the single scan line mode at the touch of a button. The NCR RealScan 92 also includes PACESETTER software, which uses unique NCR decoding algorithms that correct, read and report poor quality bar codes. These innovations generate exceptional read rates and in turn high levels of associate productivity.

### Overcoming Scanning Challenges

The NCR RealScan 92 helps retailers overcome their scanning challenges, which include expediting associate training, reading poor quality, odd size or hard-to-reach labels, and offering the speedy throughput your customers will appreciate. In addition to being responsive, versatile and easy to use, the NCR RealScan 92 is also rugged and able to withstand the abuse that is common at retail checkouts.

### Sales Associate Focused

The small, lightweight NCR RealScan 92 has fingertip recesses to facilitate various methods of scanning, and its ergonomic design allows the sales associate to comfortably
