

Nicky Blaine's

From its inception about seven years ago in downtown Indianapolis, Nicky Blaine's realized a reputation as a pretty cool place to hang out for the downtown crowd. Separating themselves from the pack with their extensive cigar selection and unlimited assortment of really tasty martinis, Nicky Blaine's outgrew their space and moved right across the street doubling their space in December 2004. They have a five terminal Maitre'D system with a back office server utilizing remote kitchen printing capability.

"Our previous vendor had informed me that he was no longer in business and that I essentially had to fend for myself."

"Those concerns were unfounded as we can literally throw a greenhorn on the system and by the end of the night, the rookie is performing almost like a veteran."

"Daily balancing procedures and cash accountability are simple tasks with Maitre'D." Additionally, timekeeping functionality and control has been great to work with and accommodates all the TEFRA reporting—"

"As part of the system flexibility, the bar register presents a different screen than the servers, since after all, they perform different functions—"

"In short, I think most nightclub /bar owners would be very happy with the combination of CRS/Maitre'D handling their POS requirements."—Simon Robinson owner
