

# OHYUMM BISTRO

Nestled in the middle of a quaint old Indianapolis neighborhood is an incredibly refreshing restaurant experience called OhYumm Bistro. Patti Crahan began this operation from a catering background four years ago. After three years of building a following, she realized she needed a new POS system and she looked at the big three (Aloha, Micros, and Maitre'D) and selected CRS/Maitre'D. Even though it is a single terminal Touch Dynamics system, Patti has implemented an efficient accounting connection

**"Well, as it has turned out, it was much more about professionalism and support than luck that has made me a very happy camper."**

**"Most importantly, because we can handle split items, split checks, and credit cards easier, our guests are rewarded with a better dining experience."**

**"Without hesitation, I can say that CRS/Maitre'D has made OHYUMM Bistro a better operation—comparison would be to wonder about the 5-7% sales increase since we installed the system—coincidence??"**

**"Did I mention that Maitre'D is seamlessly integrated with QuickBooks which allows for a really smooth information flow to my financial statements"**

**"I would never consider another product or vendor because I have already done my research. Anyone wishing to improve their business organization along with their customer experience should be working with CRS/Maitre'D"** —Patty Crahan owner
