# Symphony POS System Features and Options

## ***SYMPHONY POS includes***

- Complete redundancy on each POS terminal
- On-line or off-line operation
- Real-time data exchange with back-end system
- Easy register style operations

## ***Fully Redundant Networking System***

- Each lane runs from a local hard drive and from a completely independent local data base
- Each lane is individually and transparently updated by back end file changes
- Floating cashier system with cash-in-drawer monitoring
- Floating account balances to ensure store charge credit limit accuracy
- Sales data is processed by back-end software as each transaction is completed which means that up-to-the minute reporting is always available
- Continuous front-end operation and unassisted recovery in the event of back-end system failure

## ***POS & Invoicing***

- Suggest retail price comparison with "You Save" printing
- Multiple tender functions including cash, check, credit cards, debit cards, food stamps, WIC, etc. with split tender as required
- Cash checking flags with negative check verification
- Not found item operation with stub printing
- UPC photo available on POS screen. (No images supplied)

## ***Customer File***

- Customer account lookup with floating account balances, credit limits, and charge posting system.
- Customer photo available on POS screen
- Customer entry any time in sale with full recalculation of preferred shopper pricing as required
- Charge transactions with optional stub receipt for customer signature and charge balance verification
- Account payment through POS terminal
- Negative check file sharing to ensure check cashing limits and security
- Preferred shoppers with point management, price level assignment, discount status, etc.
- Customer recall with photo-ID available at POS

## ***Peripherals Management***

- Internal drivers for easy set-up of printers, scanners, scales, scale-scanners, magnetic card readers, pole displays for cashier or customer keyboards, bank pin-pads, cash drawers, etc.
- Supports receipt printing or full invoice printing
- Pull-down object selection for compatible device types
- Add unknown devices with wizard driven programming tool

## ***On-screen Advertising Module***

- Create your own slide show
- Images and text files display on screen
- Advertise during transaction on reduced screen area or between transactions in full screen mode

## ***Electronic Journal***

- Records all sales data for search and review when needed
- Data stored on each lane and on back-office system

## ***Compatibility***

- SIL(Standard Interchange Language) file compatibility
- Supports all peripheral device types including scanner, scale, pole display, receipt printer, invoice printer, check endorsement, check writing, validation, magnetic card reader, operator guidance display, CRT (dual monitors using Win 98 desktop options), cash drawers, bank POS-pad support

## ***Requirements***

- Windows XP Pro
- Networking components required.
- Symphony Back Office minimum hardware suggestion is a P3 /733 Mhz with 256MB
