

WALLMANN'S SIGNS ORDER FOR TOSHIBA SYMPHONY PRO

John McKean shown signing an order for brand new POS platform from Toshiba Corporation that will improve both the control and speed necessary to compete for today's customers. John has been a fixture in the grocery business in central Indiana for over 25 years —almost all of it with CRS

With the implementation of the new software package, Wallmann's will also install electronic check acceptance which endorses, transfers customer funds and settles a check transaction within seconds. "These are different times" says John

Another control/speed improvement will come with the installation of the world's most popular signature capture device — Ingenico i6550. Not only will this eliminate waiting for the receipt to print—IT ALSO ELIMINATES STORING THESE PIECES OF PAPER
